

## The DecisionPoint Difference

Empowering your workforce with the best technology and the most accurate information to make the right decision at the right time...  
**the DecisionPoint.**

# DPS Managed Print Services Portfolio

Managed print service solutions come in many forms and can be tailored to your business' needs. DPS MPS is a complete print solution that reduces print costs, improves productivity and enhances the effectiveness of your print environment.

- Assess
- Design
- Optimize
- Implementation
- Management
- Analytics

## Assess

DPS provides a detailed assessment of your current environment, including the number of devices, different makes and models, and the types of devices running. This is key to managing costs.

## Design

DPS partners with your IT staff to develop short and long-term objectives (including SLAs) for services and management of your printing technology estate.

## Optimize

DPS in-depth assessment and design strategies will show you which devices to repurpose, replace or retain. Additionally, we will show you how to strategically place your printing equipment in easily accessible areas for an appropriate number of employees to help improve workflow and maximize your device usage.

## Implementation

The implementation phase includes printer management software deployment, customized thresholds for consumables alerts and establishing procedures for requesting supplies and service.

## Management

After implementing the DPS defined software tools, you'll be able to automate your print management technology estate, including print supply tracking and ordering, trouble shooting and repair, and usage monitoring.

## Analytics

- Change Management
- Data and Trend Analysis
- Quarterly review of program and performance metrics
- Service improvements based on trending metrics
