

20 Questions for Evaluating RFID Software

If you are one of the many business owners or managers who is evaluating RFID software and applications for your business, we're willing to bet you have a lot of questions.

Whether you're evaluating RFID for the first time or re-evaluating your current RFID solutions for your growing business, these questions are a great place to start. **These are some of the most common questions we've encountered that lead to successful RFID implementation.** While answers will vary depending on your industry and application, these questions cover the most common scenarios across multiple use cases.

→ Start Here for RFID Software & Tech Evaluations

These questions are great to help you get started evaluating RFID software and tools if you're new to this tech and trying to evaluate the business advantages.

- 1 What specific problems can RFID solve for us?
- 2 What materials, assets, or job types can we track?
- 3 Would RFID tracking remain on-premise or extend to the field?
- 4 What level of tracking do we need?
- 5 What level of accuracy do we need in terms of proximity, and time sensitivity for visibility?
- 6 Is there a known RFID for your potential RFID project?
- 7 Who's going to support the solution after implementation?
- 8 What about cloud-based tracking dashboards?
- 9 What tracking projects are not right for RFID?

→ Now It's Time to Get Strategic

If you're familiar with RFID and want to know how you can use it to make calculated gains for your business, these are the questions you and your team need to be asking yourselves.

- 10 Who is involved in the decision process, and who are my stakeholders?
- 11 How do we choose the right RFID tag?
- 12 What kinds of environmental conditions should be considered?
- 13 Do RFID Solutions integrate with existing WMS, ERP, or other systems?
- 14 How will our current operational processes change?
- 15 Who are the primary users, where are they located, and how many are there?

→ Create an RFID Implementation Plan

Once you've done a comprehensive analysis of your business practices and know how you'll benefit from RFID software and tools it's time to do the final evaluation before committing. These questions can help you create a powerful plan to ensure a successful implementation.

- 16 Is Success Measured Differently With RFID?
- 17 What kind of alerts or dashboards are available?
- 18 What are the major components and costs of implementation?
- 19 Who are the leading manufacturers and suppliers?
- 20 Purpose built devices are critical. Why?

Trusting ViziTrace With **All Your RFID Software Needs**

ViziTrace software has all the features you'll need for any RFID application. Our team of experts can help you evaluate your unique needs and craft a plan for a successful rollout that will, on average, be completed in less than 60 days. We're with you every step of the way when you choose to adopt RFID technology to grow your business. **Contact us today for more information.**
